Fancy Flights

Ed Levin, age 70

Thoughts leap across the neural net,
These fancy flights occurring yet,
Are any more than just the set,
From biochem to being?

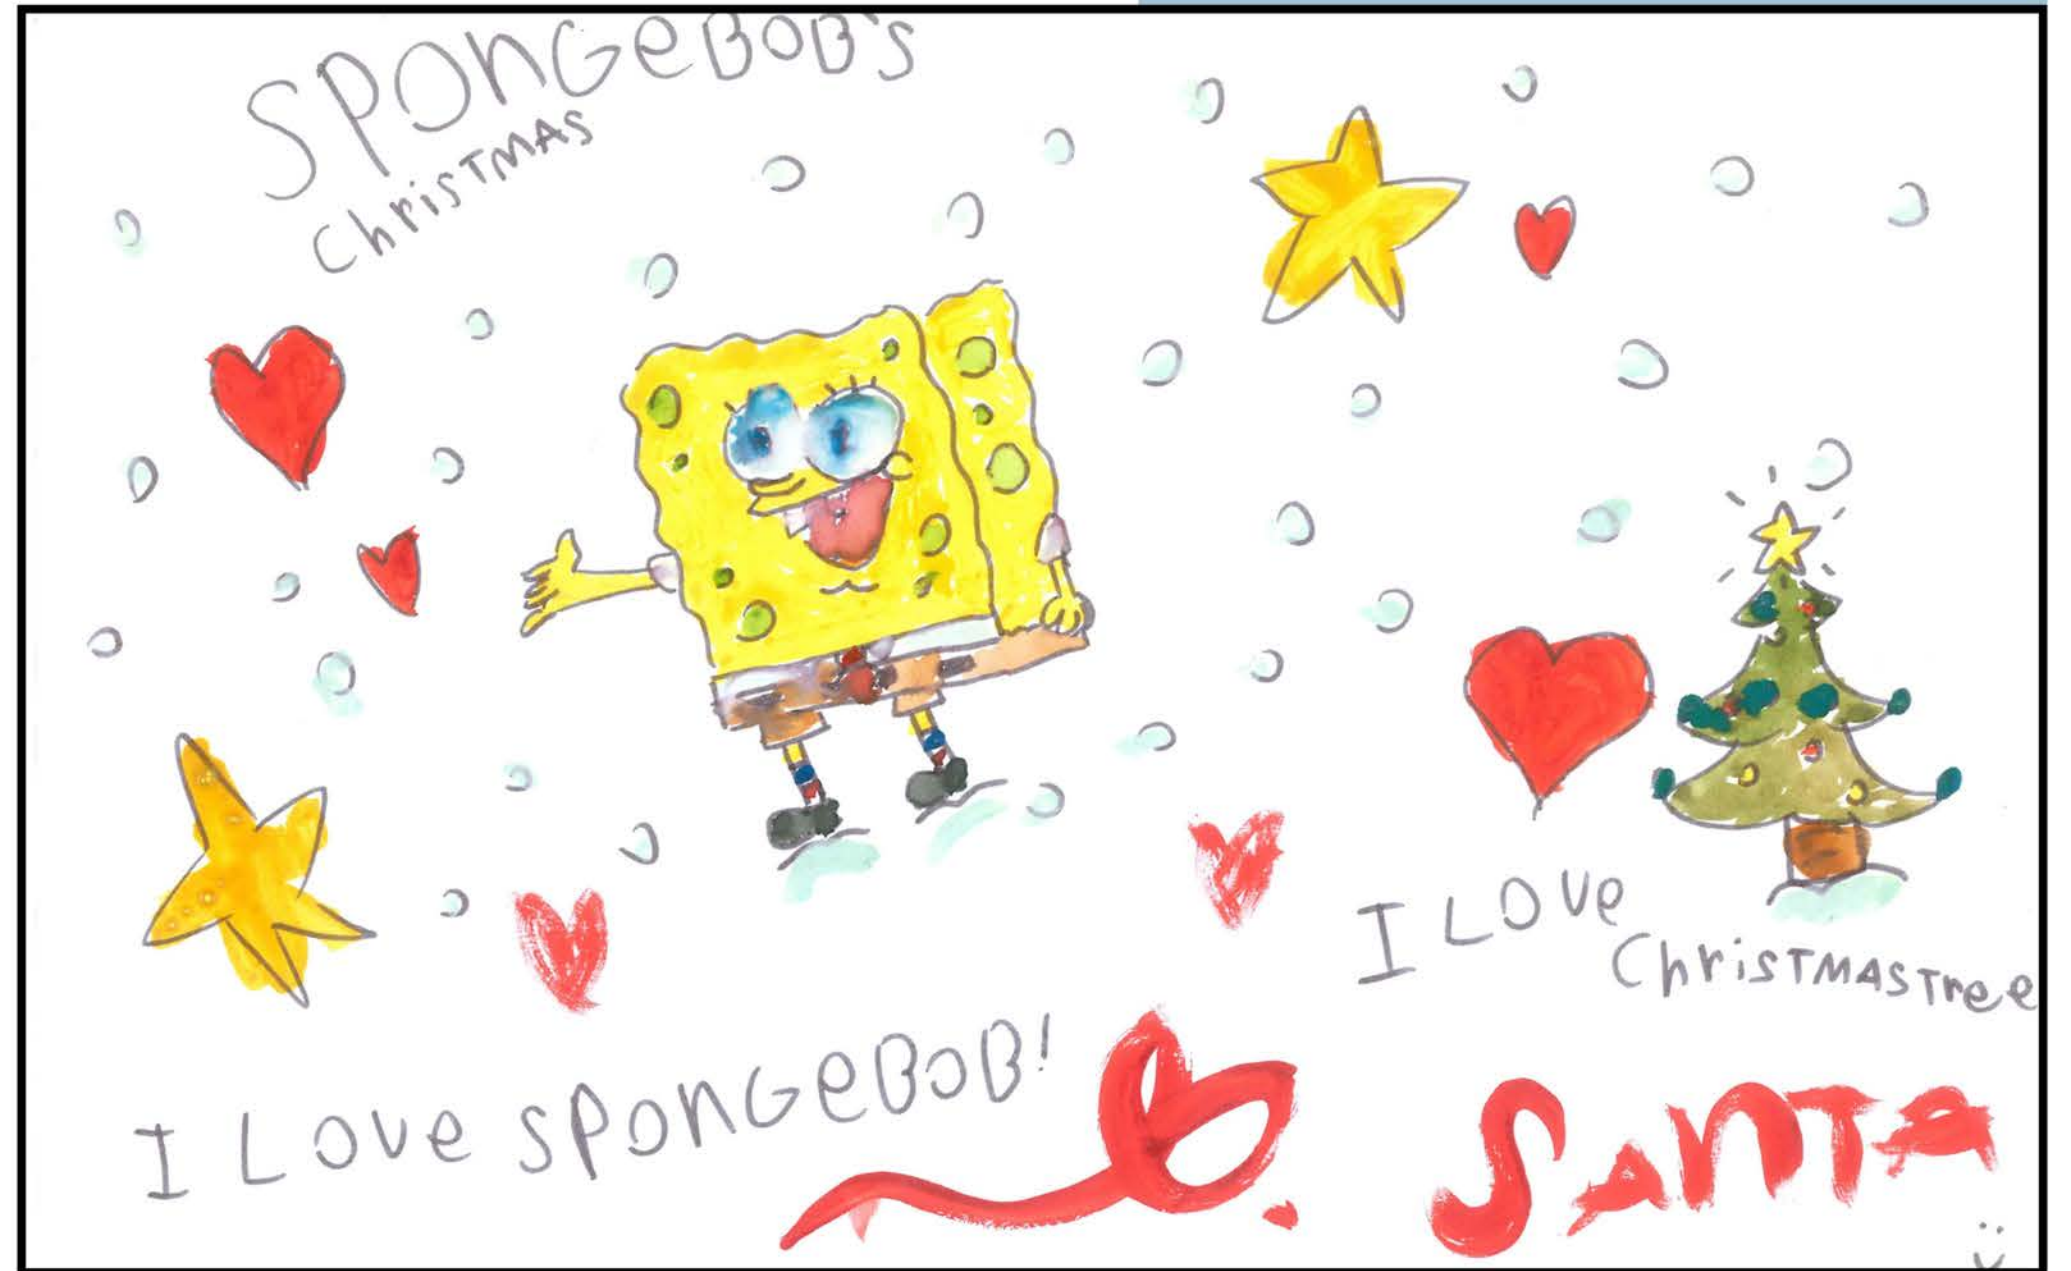

We feel and do to great effect,
This world is changed by our inject,
The brain itself receives reflect,
Thus brings new rules to seeing.

So we can look beyond the sky,
And seeking newness in the bye,
Writing poems as we try,
To walk the way to freeing.
